# ATOMO - GLOBAL FLEXIBLE - R (ISIN: LU0386704927)

A Sub-Fund of ATOMO, managed by Casa4Funds SA

## • OBJECTIVES AND INVESTMENT POLICY

We aim to provide you with **positive returns** in periods of upwards trends in stock markets, whilst **minimising losses** during market downturns.

We invest in **shares** issued mainly by **European** companies and states. We may also invest in **bonds** (loans) and **units of other funds** investing in shares and bonds and may indirectly invest in commodities. The value of your investment may be protected against adverse movements in shares by using financial contracts that are dealt in on a stock exchange. Given their characteristics, these instruments may have a significant influence on the return of the Fund.

We take investment decisions by periodically re-assessing the asset classes in which we invest based on our anticipations concerning the global economic and political conditions. This analysis allows us to **identify promising medium to long term investments** and provides us with basis for our investment decisions.

This share class does not distribute any income to you.

**You can buy and sell shares of this class every bank business day in Luxembourg.**

Your **first investment** must amount to **more than 1,500.00 euros**.

## • RISK AND REWARD PROFILE

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, **it does not necessarily reflect your future risk, nor reward**.

This share class is classified as above, since it has experienced **moderate movements in its price**. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

**This fund does not provide you with any guarantee** on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, **under normal market conditions**.

The **following other risks can be significant** to the Fund:

- Issuers of loans (bonds) may fail to meet their payment obligations. We mitigate this risk by a thorough analysis of the financial condition of their issuers.
  - Investment positions may be relatively focused on one particular economic sector or country.
  - The shares, bonds and funds in which we invest can be easily sold in normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you.
  - Investing in emerging economies can present risks inherent to political stability, economic conditions, and/or regulatory and fiscal environments that may adversely affect the price of the Fund.
- More details on the risks you may face when investing in this Fund are described** in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Active Sub-Funds of the Funds" section thereof.
