ATOMO - MIXED - C (ISIN: LU0111757083)

A Sub-Fund of ATOMO, managed by Casa4Funds SA

• OBJECTIVES AND INVESTMENT POLICY

We aim to provide you with **stable returns over time**, by minimising the amplitude of variations of the Fund.

We invest in other funds pursuing **non-traditional investment strategies** (alternative strategies), all **compliant with European regulations**. To achieve our objective, we also invest in bonds (loans) issued by European states and companies. These bonds carry fixed interest and are dealt in on a stock exchange.

We base our investment decisions on the **Lyxor Hedge Fund Index**, which risk/return pattern we seek to replicate without copying its composition. Our investment process only uses alternative strategies in which it is possible to invest. Based on these, we construct the portfolio in such a way to **achieve low variations in the Fund**.

This share class does not distribute any income to you.

Buy and sell orders received before 16:00 (Luxembourg time) on Mondays will be executed the following Tuesday which is considered a bank business day in Luxembourg.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

• RISK AND REWARD PROFILE

The above indicator reflects the historical level of risk and reward of this share class over the last 5 years. As it is based on its historical behaviour, **it does not necessarily reflect your future risk, nor reward**.

This share class is classified as above, since it has experienced **large movements in its price**. This classification is solely valid as of the date of this document; it can change in the future.

If you invest in a fund in the category "1" above, you may sustain a loss. A fund in this category is not risk-free at all times.

This fund does not provide you with any guarantee on performance nor on the value of your investment in it. The latter may consequently go up, as well as down.

The indicator captures the impacts on the Fund of adverse movements in financial markets and currencies, **under normal market conditions**.

The **following other risks can be significant** to the Fund:

- Issuers of bonds may fail to meet their payment obligations. We mitigate this risk by a thorough analysis

of the financial condition of the issuers.

- Investment positions may be relatively focused on one particular economic sector or country.

- The bonds and funds in which we invest can be easily sold in normal market conditions. Exceptional circumstances may lead to situations where those can only be sold at a loss for you.

More details on the risks you may face when investing in this Fund are described in the "Risk Factors" and "Risk Management Process" sections of the Prospectus, as well as in the "Active Sub-Funds of the Fund" section thereof.
